1946 Price List

LONE TREE

DAHLIA GARDENS

GREETINGS TO ALL FLOWER LOVERS:

At the beginning of a new year it is with pleasure, I send you the 1946 flower root price list. Again we have a limited crop of medium sized field grown roots for your choosing. Now that the war is over and we can turn our efforts and thoughts back home let us each have a few flowers to divert our attention to the "Beauties of Nature" and thank God for our beautiful country and the glorious victory He has given us.

I wish to thank you one and all for your past patronage the blossoms from which I hope you have enjoyed and hope to merit a share of your 1946 requirements.

Thank You

MRS. CORTIS RAY

VISITORS WELCOME

Best time for Dahlia Visits is late September and early October. Mums are usually in bloom then too.

INFORMATION — READ BEFORE ORDERING

When you receive your roots, you should keep them in a place where they will not dry up as they are alive and you should take care of them the same as you would live plants when you get them. Dahlias can be put in a box of dry dirt, sand or sawdust to keep the air away or you can water sparingly, (about every 2 weeks) just so they are damp. If watered too much or planted too early while ground is damp and cold they will rot. Nothing is gained by planting too early and most of them rot when weather is continually raining outside. All roots are not the same size but that makes no difference in the size or quality of your

bloom—all that matters is a good eye (not even a sprout as they are so tender when grown in the storage room, they get broken off in shipping, so better to not have them sprouted). Any small root will bloom the first year if you tend them properly and they have enough rainfall during blooming season. We grow many varieties that are not listed and only a limited amount for our own planting but sometimes I use a few as substitutes. They will be higher in price altho you get them the same as what you ordered, so don't think they are not any good if you get a substitute.

Labor (inexperienced too) is very high here in the north, 50¢ per hour with board and that surely counts up over a period of a year, hence the slight rise in bulb prices. Prices have been raised by all bulb growers and are very scarce at that.

GUARANTEE—All stock is both State and Federal inspected semi-annually and each order carries a copy of same. All roots are guaranteed true to name; roots are cut with good eyes and are in excellent growing condition when they leave here and if handled by the customer properly, will give you satisfaction. If you should have occasion to return a root for exchange please **don't fail** to send back your old root for inspection. This exchange applies only to separate varieties for which you paid the special prices (Not any collections.)

TERMS—Orders are for cash. On all orders over \$1.00 I pay postage—anything less than \$1.00 you send 10¢ extra to help on postage. **NO C. O. D. orders unless you send one-half of it with your order.** Then you must also pay the postage and extra C. O. D. charges.

EARLY ORDERS—Many varieties are limited in amount this year so I suggest that you order early to be sure of getting what you want, since all orders are filled in rotation as they are received. If out of a particular variety that you order, I will send another as nearly like it as I have, rather than disappoint you. **Orders will begin to the Southern States about Mar. 1 to 10, 1946 and in the Northern States about April 10 to 15, 1946. No orders shipped after June 1, 1946.**

PLANTING DAHLIAS—Plant dahlias about 4 to 6 inches deep—lay tuber flat down and fill up the hole to one-half with soil. Wait until bulb gets up 3 to 4 inches then fill in with rest of soil. Plant 30 to 36 inches apart and at garden making or corn planting time in your locality. When your dahlias get 12 to 15 inches high, pinch out the top and let the side shoots grow. That makes more flowers and for bigger flowers you can keep these shoots disbudded. The stems will then be longer. After frost has killed the tops, before the ground freezes deep, cut off the tops, label and store in a cool, damp basement, with temp. of about 40 to 45 degrees. You may also put clumps in barrel, or box dry

sand. dry sawdust or any thing to keep the air away so they will not dry up. Store immediately after digging; don't allow any drying. Cut apart each tuber in the spring and plant separately.

MINIATURE DAHLIA COLLECTION

(Mixed Pompon and Miniature Types, 1 dozen \$3.00)

These are medium sized flowers the blooms of which are suitable for table. house, hospitals and any place you want to use smaller flowers. The collection is left to my own choosing and I'm sure you will be well pleased.

Gypsophila OR BABY'S BREATH PLANTS

Just about 1 dozen (4 year old plants) @ \$1.00 each.

FREE PREMIUM BULBS

For orders sent me up to March 15, 1946 (no collections included) I will allow you to select 20% in bulbs of your own choosing from this price list at prices opposite each name (**No cash discounts, only roots extra from this price list**). For example, your order comes to \$20, then your free bulbs should come to \$4 worth.

CANNAS (\$1.50 PER DOZEN)

Cannas are a pretty yard flower and make a big show in the fall with their pretty blossoms and leaves. Will have them in **The President, red Yellow King Humbert.** yellow and **City of Portland** pink. You may have your dozen all of one kind or 4 of all three varieties

GLADIOLUS (75¢ per dozen for large size)

These will be florist's mixture unlabeled, all colors mixed. Gladiolus are very scarce and high because of high cost of labor and so many not growing bulbs the past few years.

FLOWER SEEDS (10¢ packet)

Will have large flowering Zinnias, mixed colors Mum flowered marigolds, mixed colors. Pink cat tail celosia or coxcomb in pink, very odd.

HARDY CHRYSANTHEMUM PLANTS

(\$1.50 per dozen, assorted but unlabeled)

These plants will be in many colors and include pompon, decorative and button types. They are from the same plants from which I sell cut flowers to the florists. Plants are not ready for shipment until last of May or June 1st, depending on the weather as they are grown outside. Your mum order will come to you separately.

CUSHION TYPE CHRYSANTHEMUM PLANTS

(25¢ each plant—Ready about June 1st.)

Will have red, bronze, cerise and pink. They are the low bushy type that's always covered with bloom for the rockery or yard.

TUBEROSES—SINGLE MEXICAN

(25¢ each clump—limited amount)

Will have a few white single tuberoses. This is a very sweet scented flower and popular with most everyone.

SURPRISE OR LARGE DAHLIA COLLECTION

(Large sized double blossomed flowers—12 for \$3.00)

This is the collection that is advertised of 12 different choicest dahlias, each labeled with its true name. **The selection is left to me** and the roots are cut with good eyes and in good growing condition when sent out. **Please do not ask for special varieties** as I treat everybody alike. You are getting these 12 for \$3 at a price of 25¢ each less postage—just one-half and in many cases even more than that, as in no case will a dahlia cost you less than 50¢ each (if bought separately) and since this is true, **no replacements of bulbs will be made in this collection**, for if a few fail to come up you still have much more than your money's worth. I am sure you will be very much pleased with their blooms as I have had thousands testify in the past many years that I have sold this collection. This collection will not have all the same bulbs the whole season through for as some exhaust I add other varieties, but if you are wanting special varieties order from the special names paying the price opposite the name. **Do not ask for special ones** to be put in this collection.

MINIATURE DAHLIAS (FORMAL AND INFORMAL)

(Medium sized flowers—for all purposes)

- \$.50 Baby Sagamore—Long stem, buff formal
 - .50 Bishop of Landaff—Fire red English duplex
